

PYROTHERM CS 400/CS 400-M1

Infrared calibration source/black body

Overview

Description

The two-piece infrared calibration source PYROTHERM CS 400 is used for calibration and examination of infrared radiation thermometers and infrared cameras in the temperature range from 50 °C to 400 °C.

It consists of the radiating unit and the controller unit, connected with two cables. The total emissivity of the blackened surface is approximately 97 percent. Digital PID controller and precision platinum resistance thermometer Pt100 provide excellent accuracy and stability.
